

Creating Anonymous Test Data

Jason Roberts

@robertsjason | dontcodetired.com

Overview

Anonymous strings and numbers

Anonymous DateTimes & TimeSpans

Sequences of anonymous data

Complex object graphs

Types with data annotations applied

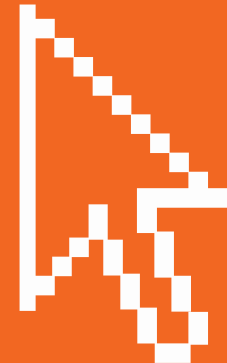

Primitives and Simple Types

Creating Anonymous Strings

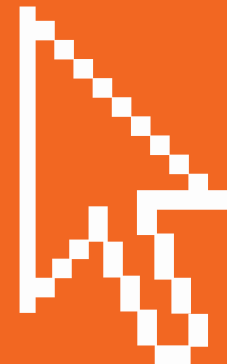

Anonymous strings

Anonymous seeded strings

Anonymous chars

Creating Anonymous Numbers

Creating Anonymous Dates and Times

Sequences and Complex Types

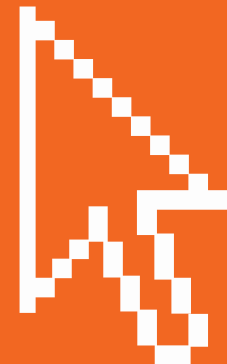

Creating Anonymous Value Sequences

CreateMany() method

Strings and ints

AddManyTo() method

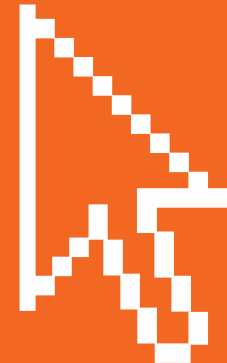

Using a creator function

Creating Custom Objects

Manual object creation

AutoFixture object creation

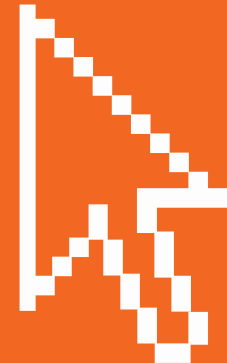

Creating Complex Object Graphs

Manual object creation

AutoFixture object creation

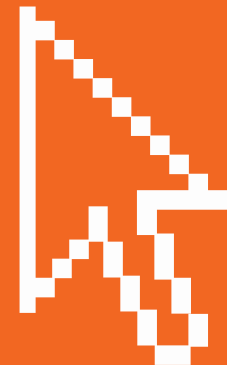

Creating Objects with DataAnnotations

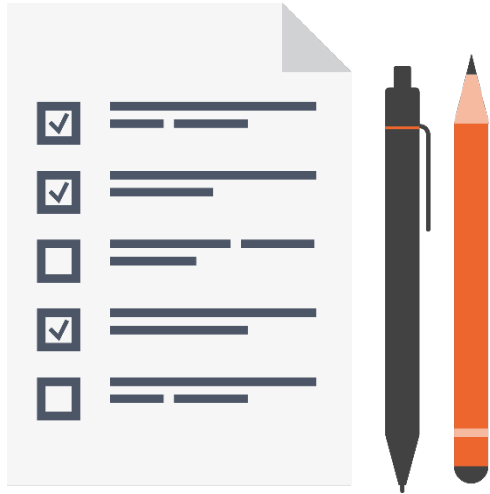

Creating Sequences of Custom Objects

Sequences of simple custom types

Sequences of complex custom types

Summary

`.Create<string> .Create<int>`

`.Create<DateTime> .Create<TimeSpan>`

`.CreateMany()`

`.AddManyTo()`

Complex object graphs

`[StringLength]`
